Carlsbad (Okla.)	2.25	Boggs	1.50

Authorized Increase
of Capital Stock

The Union National bank was yesterday authorized by the comptroller of currency to increase its capital stock from \$300,000 to \$500,000. This is an evidence of their well deserved prosperity.

Shreveport Attracting

Many Oil Men

According to a wire just received from Shreveport "there have been many oil men up producers here looking over the field and they will all go on record as saying that the entire country looks better to them than any they have ever visited before. As could be expected prices of averages are becoming more fixed every day."

Nice Well in Fisher

District

The Oklahoma Producing & Refining corporation have a well which is making 100 barrels in the northeast of southeast of 30-19-11 on the Payne farm. It is producing from the Glenn sand found around 1,800 feet.

There are some shallow gas wells about a quarter mile to the north of this well and some small producing wells a half mile north. This looks as though it has opened up something new or rather extended this pool south about a half mile and makes things look mighty good down there.

Weekly Review of the

Belegs District

During the past week there were quite a number of small wells completed throughout the Belegs district, while several important dry holes were also completed. Some wells were rather off week in this field, so a number of wells are nearing the sand and some might good news is looked for.

The Prairie Oil & Gas Co. No. 3 in the center of the north line of the northwest of northeast of 1-18-11 got sand 1,768 to 1,793 feet and is good for ten barrels.

The Jontell Gasoline company No. 1 in the extreme northwest of 20-15-11 was drilled to 2,593 feet and has been plowed back to the Glenn sand from 2,039 to 2,130 feet and is good for 20 barrels after a shot. This well has been completed several weeks. No. 2 in the southeast of northeast of northwest of southwest of 12-18-11 is drilling at 250 feet.

The Invadore Oil & Refining Co. No. 1 in Hukka in the southwest of northeast of southwest of 13-11-12 is dry and abandoned at 2,664 feet.

Late News From Texas

By GEORGE R. KEELLY

FORT WORTH, Texas, Sept. 23.—The Hamilton No. 2 of the Conifer Oil Gas Co. in the southeastern part of the Denison field is flowing at the rate of 75 barrels an hour.

The well is completed in the northwest of northeast of 1-14-11 and is good for 100 barrels. The Gladys Bell Oil company No. 4 Adams in the southeast of northeast of southwest of 6-14-12 has an 800-barrel well in the same location. The well is 2,150 feet and is good for 20 barrels.
